Nope. The only response I got was Curtis' draft desk statement on the issue.

Dan:

Have you received any direction on this?

See concerns from Virbac (company across St. Charles Rock Road from West Lake) below and let me know what you'd like me to tell them. This is another reason to promptly rebut the "data" the Post-Dispatch cites.

Hello

Virbac has concerns due to the April 25th article from the St. Louis Post-Dispatch *High levels of radiation found in soil at Bridgeton Municipal Athletic Complex*. The article is vague; independent test results "show an unusual gamma radiation spike" and EPA states the radioactive contamination is contained to the West Lake Site. Ben Washburn of EPA states "its too early to say what the test results mean". Has EPA reviewed the test results and could share with Virbac? Could EPA

collect soil samples from Virbac in the near future for verification? Virbac would collect a duplicate soil sample and submit to a different laboratory. Your thoughts on this? Thanks Dan.
